Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,312,410 to Yamamoto.

Yamamoto discloses a syringe having a body 2, plunger 3, at least one attachment member 3 and at least one rotation member 101. See Figures 1-10.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto in view of U.S. Patent No. 5,383,858 to Reilly et al. (hereinafter "Reilly").

Yamamoto discloses a syringe body 2, plunger 3, attachment member 5, annular ridge, tab member 5 and flange 5. In reference to claim 3, Yamamoto discloses a projection 101. In

reference to claim 11, it is considered that the attachment member may be removed vertically, depending on the position of the injector. See Figures 1-10. Yamamoto, however, does not disclose an encoding device. Reilly discloses an encoding device 70 on a syringe. See Figure 2. It would have been obvious to one of ordinary skill in the art to modify the invention of Yamamoto, by including an encoding device, as suggested by Reilly, in order to prevent misdose of medication to a patient.
